BLANKOM® IPTV Headend Technology

Broadcast grade, high performance transcoder for up to 32 SD or 16 HD or 1 4K UHD channels. (Ex.: 30 HD to HD reducing bitrates by keeping format and codecs are also possible)
BTR-6000 can process SD/HD efficiently based on the high-performance processing chip, is designed specifically for IPTV systems with HEVC/H.265 low bit rate compression.

The channels can be converted to a low bit rate (<600kbps, D1) while maintaining picture quality. It also supports IP re-multiplexing MPTS and SPTS streams.

The multiple Video resolution functions can be perfectly used for multi-screen (TVs, Smart phones, tablets, PCs, etc).
The friendly network management interface can help configuring and monitoring the working status easily.
